WHERE STARTUPS

MEET

CORPORATIONS

Future 4.0 conference was born in 2018 as the answer to the real pain of corporations, which are aware of **the benefits working with Startups** which are moving fast, have fresh ideas and can give added value to their development in the direction of Industry 4.0.

They all had the same problem – **how to find the Startups which are the perfect match for them.**

That's the part where we get in.

SAŠA incubator is located in Velenje where we live the industry vibe. We have the knowledge, connections and the energy to offer the quality solution. It is called Future 4.0.

Last year **9 corporations** joined us in the Future 4.0 and we brought **45 eligible Startups from 7 countries.**

We organized **156 1:1 meetings** for the corporations with the selected Startups and the feedbacks from both sides were great.

Now we want to give you the opportunity to become the Future 4.0 Corpo partner and step in to the new dimension of the event.
